ACS-2941(3) Unix (3 hrs Lecture)

Course Description

This course provides students with advanced concepts and knowledge of Unix, one of the most widely used operating systems. The course introduces students to such topics as shells, filters and pipelines, the Unix file system, processes and job control, and Internet communications. Emphasis is placed on Unix shell programming, which provides valuable tools for developing powerful applications with a minimal amount of written code.

Requisite Courses: ACS-1903 or ACS-1805 with a minimum grade of C [prerequisite(s)].
